MSS GEORGIA SLEDD

The Democratic Nomination For ient of Schools of mery County.

saft. Sterling, Ky., Jan. 5 .- Miss Georgia Sledd, for years associated with the Mt. Sterling Collegiate Institute in this city, has announced her candidacy for the Democratic mination for superintendent of schools of Montgomery county, and will push her canvass from now until the primary to select the candidates. Miss Sledd is a daughter of Deputy Sheriff William Sledd and is one of the best known teachers in the county. The present superintendent, M. C. Goodwin, has also announced as a candidate for re-election.

James W. White and Frank Norton, who are opposing candidates for eriff, have formed a combination, White taking the chief deputyship, and putting William Cravens, who was to be White's deputy, out of the running. As a result there is a lot of "howling" among Cravens' friends and they are insisting on his getting in the race for sheriff.

AVERAGE WEIGHT OF BRAIN

Professor Frederick W. Mott Gives Difference Between Savages and Races Long Civilized.

Professor Frederick W. Mott, lec turing before the Royal Institution of Great Britain on "The Brain," said promptly. that although in 88 per cent. of the cases in which the brains of great men had been weighed the weight was above the average, brain weight itself did not always mean brain qual-

When there was lack of the functionating tissue, the lecturer explained, the structural material might recelve more than its normal share of nourishment and the extra weight be due to overgrowth of "brain scaffold-This accounted for the very large and heavy brains sometimes found in congenital idiots. Pointing out that the brain weight of a race long civilized surpassed that of aborigines, the lecturer stated that whereas the ordinary European hospital patient had a heavier brain than a say age, the Chinese coolie laborer's brain developed by centuries of use, weighed 11/2 ounces more than that of the European hospital patient.

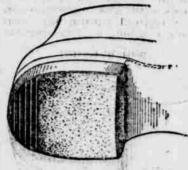

Referring to the relative brain weights of Caucasian men and women, Professor Mott said that the female brain had a good start, weighing nearly 11/2 ounces more than the male brain at birth. In adult life. however, the average man's brain weighed about 51/2 ounces more than the woman's.

The average weight of the Euro pean male brain is 2 pounds 15 ounces drams to 2 pounds 16 ounces 9 drams, and of the female brain 2 pounds 10 ounces 14 drams. Among savages there was not this difference. since in the struggle for existence the female had to apply her brain as fully as the male, hence it was developed at practically the same rate.

The Scientific American illustrates and describes a rubber heel, recently invented by Andrew W. Carlson of Spokane, Wash. This invention comprehends a rubber heel of a peculiar conformation adapted for removabe en-

gagement with the heel of a boot or shoe. The inventor provides a rubber heel together with means whereby it may be securely held in position on the heel, a rubber heel being provided with an extending engaging means whereby it may be positioned on the heel. A perspective view is given in the illustration, showing the heel in position with the fastening means. The device is adaptable for use in cases where one may desire the rubber heel at some times during the day and its removal at another time. The fastening means comprises a bent number having inwardly extending portions and it is formed of risilient
